

# CONSUMABLES ALWAYS READY

## Custom stock program.

At **BELCA** we know the importance of always having the right materials for your production, without equivalences or substitutions. For this reason, we have created a **personalized stock program** for our clients that guarantees that the material of habitual use is available in our warehouses.

Now you can forget about having the reels of the next campaign in your warehouse.

## We take care of it.

**You will have the consumables you need when you really need them.** Our permanent stock includes shrink polyolefins, BOPP polypropylenes, polyethylenes, complex films, stretch films and next generation biodegradable films, **both for the Food and Non-Food Industries.**

In addition, our films are mostly subject to customization to adapt them to specific productions in our **Printing and Handling Section**, where we can prepare special measures and print up to 6 inks.

## Up to date with your production:

With our stock plans, you will always have the necessary consumables for your production, avoiding unnecessary stops.

**Agile supply** of films and consumables.

**Personalized advice** based on your needs.

**Take a step forward, get in touch with us and find out about everything BELCA can do for your company.**
